

Homework Due April 1

Here's the unlisted link to the unabridged class video.

<https://youtu.be/HV3iCigOIJg>

(I may shorten the video later as there are a few lulls in there, but the link will be the same.)

Your homework is to get your car racing code corrected and working. Ideally, tweak the code yourself to vary it up. You could add another Tesla to the race. You could add in a different car image. Race the cars faster or slower. Make the cars bigger or smaller. Change the cars starting locations on the screen; race the cars backwards; race snails instead; or whatever. See chapter 12.
