

Homework Due February 25, 2022

Read Chapter 9 in the *JavaScript for Kids* text.

If you can attempt the examples in the book, great! Using repl.it.com is an easy way to run the book examples as the HTML skeleton is already set up for you. Don't forget to include the jQuery library when using jQuery, and include the library before you use it.

There is nothing to actually turn in this Friday. If you have questions, let me know.
