

Homework Due November 12, 2021

https://www.youtube.com/watch?v=H73G7_pk_V8 This link is an unlisted YouTube video of today's class. The video only shows what was shown in my browser. No students are shown, and nothing from the whiteboard is shown.

1. Start reading chapter 6 on page 89 in the *JavaScript for Kids* text. Once you reach the CONDITIONALS section on page 91, start typing the examples in the reading into your Google console. You may stop reading on page 96 when you get to LOOPS.
2. Complete the TRY IT OUT! On page 96. Email me your code.
3. **BONUS** – Improve upon the dice game we coded in class (maybe a third player?) or make your own game utilizing the *if...else if* chain. While you'll need your file to be a .html file to run in your browser, save another copy as a .txt file and email me the .txt file as an attachment.
