

# Spring Break Fun!

If you missed class today. Have no fear. YouTube is nearly done processing an unlisted recording of today's class. You can watch it at <https://youtu.be/qmmcLLjO9M> until I take it down when co-op is finished.

You can “fork” code from my repl's, but I think you will need to be logged into your account to do so. Forking creates a copy on your account for you to modify without changing the code on my account. If you use the “invite” button to invite others to any of your repl's, they can change the code saved in your account. Remember our accounts are free, public accounts. Do not put any sensitive information in your repl projects.

The code from today is here...

<https://replit.com/@eteefer/WheresTheTVRemote#index.html>

The code for another repl for you to modify is here...

<https://replit.com/@eteefer/HiAndByeSharkyAndBob#index.html>

Remember to check for code in the style.js files and style.css files as well.

Now for the spring fun...

Modify one of the two above repl's. It can be a big or small modification. Just make it look like you had fun with it. Modifications can include using your own images, altering arguments sent to functions, adding something new, etc. **Due Friday, March, 25, 2022.** Send me questions if you have them.
