

Homework Due November 8

1. Make sure your text editor is installed.
2. Highlight and copy the line of code below (with ctrl-c) and paste it to your Google Chrome console (with ctrl-v). Be ready to explain in class why the code doesn't work.

```
console.log("This won't work. Why?"); //does anything look funny?
```

3. Finish reading chapter 4 in the *JavaScript for Kids* text. Type in all the blue examples in your reading into your Google Chrome console. Complete both programming challenges at the end of the chapter. Email me these solutions.
4. Bring to class on a piece of paper that shows your work the decimal to binary conversion for the following numbers:

27

42

5. EMAIL ME IF YOU NEED HELP!!!
