

Homework Due February 14

Continue your reading of Chapter 8 in your *JavaScript for Kids* text starting at the top of page 135. Finish reading the chapter. Complete both programming challenges 1 and 2. Email those to me.

Also, if you didn't show me a function you created in class, email that to me, too. I need to make sure everyone is fully "function"-al before we go on.

Make sure your computer has a text editor that can save .html files on it for the next class.
