

Read all of chapter 1 in the *JavaScript for Kids* text.

Send me a working drawCats program (on page 8 in the text) that draws a different picture a different number of times. Make sure your picture is between the double quotes where the cat face =^.^= is. Copy and paste your code to an email and send it to me (and cc'd to your parent). Save your sent email in an email folder you make up for this class in case I don't receive it. I'll test your code in my console.

Remember:

To open the Google Chrome console hold down...

Control-shift-j for Windows

Command-option (or shift)-j for Mac

Use shift-Enter to type in multiple lines of code

If you need help, let me know! I enjoy coding, so I won't find it bother.
