Pop-up Examples to type into the Console

prompt()
-has a text box for user to enter text and two buttons: OK and Cancel
-the the prompt function returns the string entered in the text box after the user presses OK
-if the user presses Cancel, a value of null is returned

Example 1

```
var myEx = prompt("What is your favorite class?");
console.log("I like " + myEx + ", too!");
```

confirm()
-has OK and Cancel buttons, but no text box
-confirm function returns boolean false if Cancel is selected
-confirm function returns boolean true if OK is selected

Example 2

```
var choice = confirm("Would you like to continue deleting all files?");
if (choice === false) {
  console.log("Good choice!");
} else {
  console.log("Dude, I was just joking!");
}
```

alert()
-has OK button
-used only to notify user
-doesn't really return anything, just undefined

Example 3

```
alert("Press OK to delete all files."); //mean joke, no real value to catch in a variable
```
