# Homework Due February 21

Start reading in your JavaScript for Kids text at the beginning of page 143 and stop at the bottom of page 147.  Now skip over and continue your reading on page 155 and stop right before CANCELING A TIMEOUT on page 157.

I sent you two files in your homework email, replacingHeadingDOM.txt and replacingHeadingDOM2.txt.  Download those, open each file in your text editor, and save them as .html files.  Find these two .html files in your folder and double-click on them to run them in your browser.  Be ready to discuss in class what is different and why.

Remember if you want to add comments to your html file, use JavaScript comment syntax only between the script tags.

ie.

//my JavaScript comment here  or

/* my JavaScript comment here */

Use html comment syntax outside of the script tags.  ie.

<!--This is an html comment-->
